

Taras Zakharuk

Software Developer C#

SUMMARY

C#/.NET Software Engineer with 2 years of experience developing modern desktop and web applications. Skilled in WPF, ASP.NET Core, Blazor, clean software architecture, REST APIs, and relational databases. Experienced in unit testing, quality-oriented development, Git, Docker, and CI/CD workflows.

Team-oriented, eager to learn, and well-structured, with business-fluent German and very good English communication skills. Passionate about leveraging modern AI-assisted development tools such as Claude and other AI/ML technologies to increase productivity, accelerate problem-solving, and improve software quality. Excited to bring expertise and motivation to Code Compass.

Russisch - Expert

WORK EXPERIENCE

August 2025 - Present

Software Engineer C#/Blazor

Learn Project

Germany

A tutoring platform for developers where experienced software engineers can share their knowledge, offer consulting services, and book sessions for code reviews and professional exchange. During development, I focused on clean architecture, and quality-oriented software development practices, including unit testing of core business logic and API.

Technologies: C#/.NET, ASP.NET Core, Blazor, Entity Framework Core, AutoMapper, Azure, Docker.

March 2025 - June 2025

Junior Software Engineer C# .NET

Freelance project support

Ukraine, Kyiv

The goal of this project was to generate rental contracts and invoices for furniture between tenants and landlords. My responsibility was to implement the contract generation process in accordance with various tax regulations.

Technologies used: C#, ClosedXML, WPF

Die oben genannten Projekte und weitere können Sie in meinem Portfolio finden: https://taraszaharuk.github.io/My_Portfolio/

EDUCATION

Nationale Technische Universität "Polytechnisches Institut Charkiw"

Charkiw

Bachelor Fachinformatik, laufend
